PROFESSIONAL SUMMARY

Full-stack software engineer with 6 years of experience designing, building, and deploying cloud-native SaaS platforms at scale. Proven expertise in Node.js microservice architecture, AWS cloud infrastructure, relational database optimization, and leading cross-functional engineering teams through the full software development lifecycle. Experienced delivering compliance-ready, high-availability systems serving 200,000+ daily active users.

CORE COMPETENCIES

Languages & Frameworks:

Node.js | React | TypeScript | JavaScript (ES2022+) | Python

Cloud & DevOps:

AWS Lambda | EC2 | RDS | S3 | CloudFront | Docker | Kubernetes | Terraform | GitHub Actions

Databases:

PostgreSQL | MySQL | MongoDB | Redis | Query Optimization | Schema Design

Architecture:

Microservices | REST APIs | GraphQL | Distributed Systems | System Design | CI/CD Pipelines

Leadership:

Team Leadership | Code Review | Technical Mentorship | Cross-functional Collaboration | SDLC Ownership

PROFESSIONAL EXPERIENCE

Lead Full-Stack Engineer

NovaSphere Inc. | Austin, TX | January 2021 – Present

- Architected and maintained a multi-tenant SaaS platform serving 200,000+ daily active users on AWS (Lambda, RDS, S3, CloudFront), achieving 99.98% uptime SLA
- Led a team of 5 full-stack engineers across full SDLC — from technical scoping and architecture review through production deployment and post-launch monitoring
- Reduced API response latency by 34% through PostgreSQL query optimization, Redis caching layer implementation, and connection pool tuning
- Owned end-to-end CI/CD pipeline configuration using GitHub Actions and Docker, reducing deployment time from 45 minutes to under 8 minutes
- Collaborated directly with Product and Design teams to scope, estimate, and deliver 3 major feature releases per quarter on schedule
- Authored internal engineering documentation and runbooks adopted across 3 product teams

Senior Software Engineer

Datalink Corp. | Austin, TX | March 2019 – December 2020

- Built and maintained RESTful API infrastructure supporting 50+ third-party integrations across fintech and enterprise data partners
- Led migration of legacy monolith application to containerized microservices architecture using Kubernetes, reducing infrastructure costs by 22%

- Improved PostgreSQL query performance by 28% through strategic indexing, schema redesign, and slow-query analysis
- Developed React front-end components increasing user task completion rate by 18% across core product flows
- Mentored 2 junior engineers through structured onboarding program and first production deployments

EDUCATION

Bachelor of Science in Computer Science

University of Texas at Austin | Austin, TX | Graduated May 2018

Relevant Coursework: Distributed Systems, Cloud Computing, Database Systems, Software Engineering, Algorithms & Data Structures

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2022)
- AWS Certified Developer – Associate (2021)
- Docker Certified Associate (2020)
